WORK EXPERIENCE

Techflow.AI

Darmstadt, Hesse, Germany

Junior Automation Engineer

Feb 2025 - May 2026

- Automated end-to-end ticket intake workflow by extracting customer, device, and issue metadata; retrieved 3–7 relevant SOPs and device docs from Siportal; filtered results to the ticket's customer scope; delivered AI-ranked recommendations that posted as a private note within 2 minutes, reducing agent manual documentation search time by 50%.
- Automated milestone-to-deal follow-up workflow by routing SmartSuite "Completed" events with follow-up flag enabled into HubSpot task creation, eliminating manual setup across 25+ deal milestones/month and reducing stalled-deal risk by 30%.
- Built a scheduled Slack chatbot to ingest developer-channel messages every Monday, extract problem–solution pairs, and index them into a Pinecone vector database, enabling retrieval of relevant answers for up to 200+ queries/week.

EDUCATION

University of San Carlos - Talamban Campus

Nasipit, Talamban, Cebu City, Philippines

Bachelor of Science in Computer Engineering

Graduation Date: Jul 2026

PROJECT EXPERIENCE

Personal Project

Basketball Runs

Jun 2026 - Present

- Developed a game history page enabling users to view all created and joined games, with automatic MVP highlights upon game completion.
- Built the landing page displaying active games in real time, allowing hosts to instantly create or join ongoing pickup basketball sessions.
- Developed a game history and landing page system that surfaces active games, tracks participation records, and automatically highlights MVPs after each session.
- Deployed Basketball Runs to local basketball clubs for real-world user testing, gathering feedback to validate core features and improve the overall experience.

TapOK

Apr 2026 - May 2026

- Crafted TapOK's landing page experience from concept to execution, defining the platform's visual language through cohesive color systems, animation-driven interactions, and an intuitive top-centered navigation layout.

LEADERSHIP EXPERIENCE

USC Computer Engineering Council

Physical Committee

Jan 2023 - Dec 2025

- Hosted JUMP CAMP as a proctor of teaching lower years for their upcoming exam.

CES Committee

- Organized an E-waste disposal event in collaboration with Teradyne, raising awareness on proper hazardous waste disposal practices and compliance procedures.

CODE - Computer Driven Enthusiasts

Member

Jan 2023 - Dec 2026

- Proctored and facilitated JUMP CAMP, delivering review sessions to junior students in preparation for their upcoming examinations.

SKILLS

Skills: Typescript; Javascript; Next.js; React; Make.com; N8N; Prompt Engineering; Openclaw; DrizzleORM;
